HILL'S IRISES

TERMS AND CONDITIONS

All Iris orders amounting to \$1.00 or more will be shipped prepaid to any point in the United States. Iris orders of less than \$1.00 must include 15 cents for postage. Peony orders of \$3.00 or more are prepaid, those of less than \$3.00 must include 25 cents for postage. Combined orders for both Irises and Peonies should be treated as two separate orders in making allowance for postage. Foreign shipments not prepaid.

Terms: Cash with order. Payment should be made by check or postal money order. All offers subject to prior sale; prices may be changed without notice.

GUARANTEE

We Guarantee all stock to be true to name, of first class size and quality, free from diseases and pests, and to reach you in live and healthy condition. We cannot guarantee that plants will live and grow in your garden under conditions over which we have no control.

We take every precaution to prevent mistakes in filling orders, but if any mistakes should occur, we will gladly make adjustment; however, we will in no case be liable for an amount greater than the purchase price of the stock.

IRIS CULTURE

Irises are not particular as to soil, but the bearded varieties in general prefer an alkaline rather than an acid soil. They need plenty of sunshine and good drainage and are able to withstand severe drought if well established. Beardless and crested sorts, including the Siberians and Spurias, do best in an acid soil with plenty of moisture, also some kinds need partial shade. Bearded Irises should be planted with the tops of the rhizomes level with the top of the ground, except in the case of late fall planting when they should be more deeply covered to prevent heaving.

TIME TO PLANT

Bearded Irises may be transplanted any time in the spring, summer or fall, but we strongly recommend fall planting for the South and Middle West where summers are usually hot and dry. Further North the summer months are the best time for trans-

planting. Unless we are otherwise instructed we will assume that our customers want immediate shipment of their orders. Prompt shipment will be made except when digging is delayed by rain or other causes over which we have no control. A few of the very newest varieties of which our stocks are limited will not be delivered before August. Beardless Irises will be shipped in the fall or early spring.

HILL'S IRISES AND PEONIES

Hill Iris introductions will be found listed on the inside of the back cover of this catalog. We are very gratified at the reception which they received last year. Flora Campbell, in particular, was so well received as to rate an Honorable Mention. The varieties introduced last year were our first in the tall bearded class, so perhaps we may be pardoned for expressing our pride. The past winter with its severe November freeze which did so much damage to trees and plants of various kinds serves to emphasize the fact that only tested hardy varieties and well acclimated plants should be used. For the most part Irises came through in good condition, although there was some damage to late plantings and tender sorts. We advise fall planting for the mid-west, however plants should be set in time to establish themselves before freezing weather.

Our 1941 price list offers many reductions in price and the addition of fine varieties of Irises to the Standard List priced at only \$1.00 per dozen. We continue to make new plantings of both Irises and Peonies in order to be able to supply you with vigorous, healthy plants.

As usual we list and recommend a complete selection of Sass Irises. The beauty and hardiness of Sass introductions receive new acclaim each year. Last year's shipment of Irises and Peonies brought us many new friends as well as a continuation of the pleasant relationship with our loyal customers of long standing. We are grateful for your orders and letters of commendation, and we solicit your continued patronage. Thank you.

Note: Kansas residents will please add two per cent to their remittances to cover sales tax. Sales to residents of other states are not taxable.

SELECT IRISES

TALL BEARDED AND INTERMEDIATE

Separate lists of Standard Irises priced at \$1 per dozen, Fall Blooming Irises, Dwarfs, Pogo-Cyclus hybrids, Beardless Irises and Peonies will be found on following pages.

In the following descriptions the letter S refers to the standards or upright petals, F refers to the falls which are the lower or hanging petals. A self is an Iris of uniform color, a bicolor has standards of one color and falls of a deeper shade, a plicata is a light or white flower marked or stippled with a darker shade particularly on the margins, a variegata has falls of red, brown or red-purple and yellow standards, an amoena has white standards and colored falls, and a blend is a combination of two or more colors. Intermediates are early flowering sorts resulting from crosses between tall bearded Irises and dwarfs. The first intermediates were intermediate in size, height and season of bloom, but the newer ones are as large and tall as tall bearded varieties.

FALL BLOOMING IRISES

We are proud to take some credit for popularizing Fall Blooming Irises, an important new branch of the Iris family. Several years experience in handling fall bloomers has shown conclusively that they will produce two crops of bloom per year over a wide area of

the country. They are at their best in the South where they furnish an almost continuous succession of bloom. In fact a Southern customer reports at least one bloom open every day in the year from one of our \$1 collections. However, with care and

attention fall bloom can be had as far North as New England and some of the Northern states. Last fall we had a fine show with many hundreds of blooms, beginning in September and lasting until freezing weather in November. The fall bloomers are of unquestioned hardiness even in the North and are of value for their spring bloom when they add their color to the intermediate season. New varieties are adding to the color range and bringing increased size and height. Good growing conditions and adequate moisture throughout the growing season produce the rapid growth necessary for maturing the second crop of bloom. Frequent transplanting is advisable as crowded plants do not have a chance to rebloom.

AUTUMN ELF (Brown, 1935)—This variety has re-bloomed throughout the summer and fall in the originators garden in Massachusetts. Standards olive cream, domed and ruffled; falls lavender with cream edge, flaring; fragrant\$0.15

AUTUMN FLAME (Sass)—A sensational new fall bloomer of very large size and heavy substance, deep toned red bicolor\$5.00

AUTUMN FROST (Schreiner, 1934)—A seedling of Moonlight with much the same warm white tone. It is the largest and tallest white fall bloomer\$0.25

AUTUMN HAZE (H. Sass, 1934)—This tall fall bloomer has been both early and persistent in its long blooming habit and marks a real advance over fine old Autumn King. In effect it is an attractive soft lavender of fine form and large size\$0.25

AUTUMN KING (H. Sass, 1924)—The real progenitor of the race of rebloomers. Typical lavender blue bicolor of splendid form, a good seed bearer \$0.15

AUTUMN KING JR.—A redder Autumn King\$0.25

AUTUMN QUEEN (H. Sass, 1926)—The most persistent of all rebloomers, giving some bloom every month from summer to fall. It is a pure white of exceptional form, the finest white dwarf\$0.15

CONSTANCE SCHREINER — Medium blue bicolor\$0.25

DORCAS HUTCHESON (Sass-McDade, 1933)—An early and persistent pansy violet self. Semi-dwarf, up to 20 inches\$0.15

ELEANOR ROOSEVELT (Sass - McDade, 1933)—This variety was awarded the Hutcheson Gold Medal for the best fall bloomer of its year. It is a deep fluorite purple self of fine carrying power and has given us a full month of bloom in the spring and in favorable seasons three full months in the fall\$0.15

FROST QUEEN (Sass-Hill, 1933)—Free blooming frosty white. Sometimes produces so many blooms that the effect is a crowded bouquet of flowers\$0.15

GOLDEN HARVEST (J. Sass, 1930)—The first yellow fall bloomer, large flowers of fine form\$0.25

JEAN SIRET—One of the French remontants or everbloomers. It is only fair in quality as a yellow dwarf, but has undoubted value in its persistent reblooming habit and strong growth\$0.15

KANSAS INGLESIDE (Hill)—Large warm toned red self introduced last year and now proven to be a fall bloomer, although rather late ..\$3.00

LIEUT. DE CHAVAGNAC—Deep red violet dwarf, another French ever-bloomer\$0.25

MARTIE EVEREST (Kirk, 1935)—Fine tall blue, a reliable repeater\$0.35

OCTOBER BLAZE (McDade, 1935)—Large red-purple, somewhat on the order of Indian Chief, late\$0.35

OCTOBER OPERA (Sass-Hill, 1932)—Gave its first fall bloom in our garden. Its red tones are similar to the old favorite Opera, large and of good form\$0.25

OLIVE WHITE—Creamy olive white\$0.15

PEGGY BABBINGTON—Neatly formed yellow\$0.25

FALL BLOOMING IRIS COLLECTION

Our annual \$1 collection of Fall Blooming Irises has been the most popular collection of its kind ever offered, and this year it is improved by the addition of superior varieties of tested performance. TABLE IRISES

The Table Irises are late flowering dwarfs that bloom with the tall bearded sorts. They have dainty little blooms on graceful stems and are taller than ordinary dwarfs.

KINGLET—Bright yellow, very attractive\$0.25

LA BOHEMIENNE — Unusual cream and buff blend\$0.10

PEWEE—Small graceful white...\$0.25

SIBERIAN IRISES

Shipment in Fall or Early Spring

These have slender grass-like leaves and bloom on tall graceful stems. They are very hardy and thrive anywhere, but prefer a rich, moist soil. They bloom just at the end of the tall bearded season.

AMELIA EARHART (Sass)—Deep blue violet, flaring falls\$0.50

BLUE CHARM (H. Sass, 1932)—The largest flowered Siberian, strong growing bright blue self\$0.25

CAESAR—Deep blue self\$0.50

SUNNY DAY (H. Sass)—Tall gleaming yellow, very large and strikingly beautiful, the finest yellow color and one of the finest of all Irises\$0.50

POGO-GYCLUS HYBRID

These odd and beautiful Irises are the result of crosses between various members of the Bearded and Oncocyclus sections. They inherit unusual coloring and delicate venation from their Oncocyclus parents and vigor and hardiness from the Bearded ancestors. The tested varieties which we list are all strong and hardy; they thrive under the same conditions as the Bearded sorts.

BALROUDOR (J. Sass, 1933)—Soft blue violet and deep olive buff. Two flowered stems, 16 to 18 inches, vigorous (2 for 25c)\$0.15

HILL'S PEONIES

PEONIES

Peonies offered in this list are varieties of proven merit and quality. Prices are for standard three- to five-eye divisions guaranteed true to name. Delivery of Peonies will begin in September and continue until freezing weather. All orders will be acknowledged and filled in the order in which they are received. Peony orders amounting to \$3 or more will be shipped by prepaid parcel post or express, whichever is cheaper. Orders for less than \$3 must include 25 cents for postage.

Peonies do best in rich soil. Use fertilizer or well rotted manure if your soil needs it, but do not allow fertilizer to come in direct contact with the roots. Peonies are shipped in damp moss, but they should be soaked in water for a few hours before planting. In planting, be careful not to cover the roots too deep; the eyes or buds should not be covered more than two inches. All plants will be carefully labeled and packed.

LETTERS

The following are examples of the many appreciative letters we receive from satisfied customers all over the country:

Oklahoma City, Okla.
Oct. 29, 1940.

Just a note to tell you that the two orders of Iris arrived promptly last week and in excellent condition. The plants, as always from you were fine ones—thank you very much for the extra count and also the extra varieties. I was particularly glad to get the plants of your own introductions. The last of my fall bloomers to bloom, October Blaze, is now in full bloom. This is a plant I bought from you last September. It developed 5 rhizomes and it has a stem for each rhizome, the tallest 30 inches.

Towson, Maryland.
Nov. 18, 1940.

I want to acknowledge your prompt shipment of Peonies on my recent order. These arrived in excellent condition. They were fine quality roots and I am sure will do well. It was more than generous of you to include an extra root.

HILL IRIS INTRODUCTIONS

It was with some hesitation that we offered a modest list of Hill seedlings last year. The response has been such that we feel that we were entirely justified in introducing them. Reports indicate that Flora Campbell bloomed well in several widely separated parts of the country and was so well rated that it received an Honorable Mention. Other varieties also performed well in different gardens.

These seedlings are the result of several years work, and they have been selected with the idea of offering only sorts whose performance has been well tested. We are glad to be able to vouch for their vigor and hardiness. A period of testing also allows time for a seedling to increase, so that it may be introduced at a lower price than would be possible where it is offered the first year after blooming.

We have some very promising seedling Fall Blooming Irises which we had planned to introduce this year, but we have decided not to present them yet as thorough testing is necessary to establish the reliability of fall bloomers. Last fall was a favorable one for fall bloom and we had fine bloom on our seedlings as well as on named varieties. It is interesting to note that for the first time we were able to secure a few seeds from last year's fall bloom.

Special prices on complete collections of the following introductions will be quoted on request.

FLORA CAMPBELL—The neat, well rounded and modestly extended falls are really glowing in intense warm tones of red-brown and peach. The standards are a little lighter in tone with a more hazy coloring. The flower possesses unmistakable style and quality. Honorable Mention 1940\$6.00

JAYHAWK—A good bright red-purple that is a favorite with garden visitors. Flowers are large and well proportioned\$0.50

KANSAS BOUQUET—A very free flowering plicata of good size, white heavily marked with blue, often has 5 to 7 blooms open on one stalk\$2.50

KANSAS INGLESIDE—A warm toned red self introduced last year on its merits as a spring bloomer, it has now proven to be a good fall bloomer. The fall bloom comes rather late, so it is best adapted to the South for fall blooms.\$3.00

KANSAS SUNRISE—A bright toned variegata blend displaying the good qualities of its parents, King Tut and King Midas, stylish in form and of good substance\$6.00

GOLDEN COCKEREL (Whiting-Hill, 1940)—A bright yellow self selected from among the many fine seedlings in the Whiting garden, fine form\$5.00

LADY DAINTY—A silvery toned white that seems to fill a definite need in a hardy, good quality white that will bloom freely every season\$2.00

LOVELY DAY—Well branched with large blooms of splendid proportions, opens a very pale sky blue and turns cool white\$2.00

MELANIE (No. 1 pink seedling)—A tall rather deep pink that grows up to 45 inches and often has five blooms open at one time. It has less of the blue and orchid tones found in most pinks. The color tone is on the order of that found in the falls of Rameses\$6.00

ONE LITTLE INDIAN—A neat dark red self in a table Iris or late flowering dwarf\$1.00
